# JDrum

The first app for tanning industry that  
communicates production in real-time.

# Pajusco Technologie: great performances for the tanning sector.

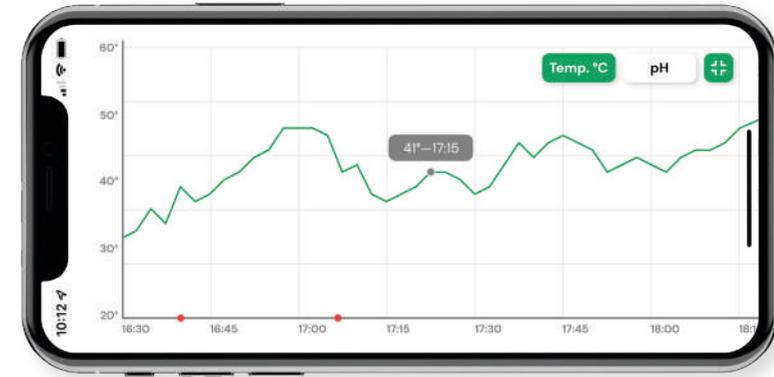

For over 60 years we have been involved in the cutting-edge tanning industry machineries production, technologies that have evolved following the progressing of our company.

Known worldwide for the **reliability, safety and maximum yield**, Pajusco Technologie's drums are manufactured with **high-quality materials** that guarantee an automated tanning process with quality.

**Technology has always been with us**, ever since our founding: from here we want to start for launch a new product intended for the tannery companies.

**It's called JDrum**, it's the revolutionary app that will help the production process manage in smart, integrated and fast way, according to Industry 4.0 models.

**This is the future.  
This is Pajusco Technologie.**

## With JDrum greater efficiency, productivity and turnover.

Connectivity and feedback in phase workflow, management of current and historic data.

These are some of the JDrum's functions, the app created by us at Pajusco Technologie to offer our customers more control during processing, getting direct **feedback during the productive process**.

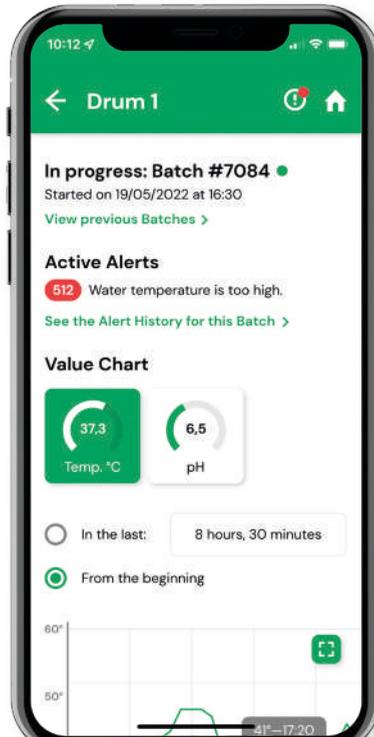

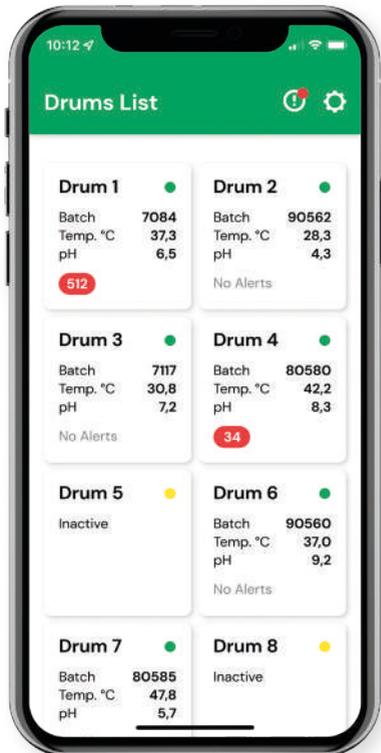

With JDrum you won't only be able to verify from your smartphone the execution of work, but you can also **promptly intercept anomalies or malfunction** that they would cause damage to raw materials being processed.

All entered data in the app will be displayed through an **interface simple, intuitive and easy to use**, to allow you to check the status of art in the present and **up to 2 years antecedents**.

Process data analysis won't need a team that will help you to decipher them, but you will be able to effectively interpret **every single one information on the production process**.

**Remote control becomes reality with JDrum.**

With **processing optimization** you will be able to meet the requests from your customers, and planning the next steps to expand yours business.

COMING SOON ON
